

Clean Tech Inverter Data Sheet

Advantages

The CTI is a breakthrough innovation for industrial process heating technology.

- Modular base design offers wide power range - 250 kW to 10MW units available.
- Frequency range from 20kHz to 120kHz.
- Low downtime with readily swappable modules

Latest SiC transistor technology and proprietary digital control algorithms ensure optimal performance and maximum efficiency across the entire frequency range.

- Durable and reliable design with built-in tuning, safety and diagnostics features.

Features

- Precise power control from 0% to 100% of rated power
- Precise output frequency control within frequency range
- Output regulation: power, current or frequency
- Parameter Monitoring: Current, DC Volts, Output Volts, Output Power, Frequency
- Advanced and intuitive user interface – includes all external control and Start/Stop functionality
- Automatic frequency scanning and load tuning
- Fast dynamic response and ramp-up time for short heating cycles
- Built-in temperature monitoring
- Remote or local control modes
- Fiber-optics or ethernet or wireless for control, firmware upgrades, and data of process and operating parameters
